Subj: THIRD ANNUAL COMMANDER'S AWARD COMMENDATION

1. I take great personal pleasure in presenting the third annual Commander's Award for Supporting the Warfighter Goal to you and the entire J52 Integrated Product Team for your outstanding contributions to Naval Aviation and specifically to the Naval Air Systems Command.

2. Your team, which consisted of stakeholders from various disciplines in the Naval Air Systems Command, the industries, Naval Inventory Control Point (NAVICP), Defense Logistics Agency (DLA) and Fleet Industrial Service Centers (FISCs), worked methodically to make a positive and substantial impact on Warfighter readiness and effectiveness. Using proven methodology and metrics, your team was able to perform analyses, address barriers to effectiveness, and provide successful resolution measures. These measures enhanced engine availability and thereby increased the readiness of the EA-6B platform, allowing the Warfighters to fight and win.

3. On behalf of the Naval Air Systems Command and the United States Navy, I commend your team's noteworthy achievements and sincerely appreciate your loyalty, dedication and performance. Thank you for a job well done.

J. W. DYER
Vice Admiral, U.S. Navy
